
5,000 vertices
$r = R/\sqrt{2}$ = 0.71 m (encloses half the area)
sensors
As simulated: uniform in the disc
$r_0 = R\sqrt{u}$, $u \sim U(0, 1)$
51 % of the points inside the dashed circle
Wrong: r_0 uniform
$r_0 = R\,u$
71 % of the points inside the dashed circle
y_0 [m]
x_0 [m]
