200,000 events from the prior
Events per 25 p.e.
Total charge $Q = \sum_j n_j$ [p.e.]
Total charge Q [p.e.]
Energy E [MeV]
Events per bin
YEf, $f = 0.401$ (wall, $r_0 > 0.95$ m)
YEf, $f = 0.262$ (centre, $r_0 < 0.1$ m)
mean Q per energy bin
