hit sensors, charge half
hit sensors, time half
empty sensors: exactly 0 in both halves (0.70 % of the entries)
every empty sensor sits at (0, 0)
Fraction of entries per unit
Charge half: log(1 + n_j)
Fraction of entries per ns
Time half: $\tau_j - \bar{\tau}$ [ns]
Time half: $\tau_j - \bar{\tau}$ [ns]
Charge half: log(1 + n_j)
Sensors per unit of log(1 + n_j) per ns
