straight
absorb (= straight + absorption)
absorb-scatter
full
straight + scattering
straight + reflection
analytic expectation
(a) Charge vs distance
a/(2πd)
(normal incidence)
Mean sensor charge ⟨n_j/(YE)⟩
Distance vertex - sensor centre d_j [m]
(b) Ratio to the straight-light expectation YE Δ_j/(2π)
Charge / straight-light expectation
e^{-d/λ_s}
e^{-d/λ_a}
e^{-d/λ_a - d/λ_s}
Distance vertex - sensor centre d_j [m]
