Timing residuals of the hit sensors (100 000 events, 32 sensors; time jitter 1 ns)
(a) First hit of each sensor
(b) Mean hit time of each sensor
3 ns
Fraction of hit sensors per ns
Residual $t - t_0 - d_j/c_n$ [ns]
straight
absorb (= straight + absorption)
absorb-scatter
full
straight + scattering
straight + reflection
