A: E = 3.0 MeV at the centre; B: E = 2.29 MeV at r = 0.8 m; 100,000 and 20,000 events
Energy E [MeV]
Vertex radius r_0 [m]
Probability density [1/p.e.]
AUC = 0.503
Total charge Q [p.e.]
Sensor charge [p.e.]
Sensor number j
Relative mean time $\tau_j - \bar{\tau}$ [ns]
Sensor number j
A: centre, E = 3.00 MeV
B: r = 0.8 m, E = 2.29 MeV
same mean Q = 783 p.e.: the B points
mean and 16-84 % band over events
