One feature per effect, E = 2 MeV at (0.6, 0) m, 20,000 events each
σ_t = 0 ns
σ_t = 1 ns
σ_t = 3 ns
Probability density [1/ns]
Relative first time of sensor 0 (nearest) [ns]
no noise
10^5 Hz
10^6 Hz
10^7 Hz
Probability density [1/ns]
Relative mean time of sensor 16 (farthest) [ns]
ε = 1
ε = 0.5
ε = 0.25
Fraction of events
Charge of sensor 16 (farthest) [p.e.]
